

*****Intro**

Hello? Is anyone out there? Oh good, you're still alive – one of the last few wretched souls. Don't get comfortable; I have bad news, the world as you knew it is no longer. You're in Zombie Hood now, and the savage undead are ransacking all that's left to live on. Save yourself from the horrors, learn how to scavenge and bash these blood curdling brain eaters.

*****Hit The Streets**

Your only survival tool is your phone, live or die by it. Use the maps to navigate through your city to find near by activity and safehouses. And keep your wits about you - it's a rotting mess of carcass out there in the trenches.

*****Scavenge To Survive**

Learn how to scavenge immediately, or go the way of all flesh – it's the key to surviving in the Zombie Hood. Grub around venues in your location for weapons, supplies, tools, and food. Don't end up mangled and mutilated, forage for medical supplies in places like hospitals, pharmacies and vets.

*****Build Safehouses**

Better build some safehouses to hoard your scavenged stockpile. But these shelters aren't just for holing up, upgrade them to improve your health and produce goods like fuel.

*****Every Man For Himself**

So get ready to defend yourself now – there's no rest for the wicked. You're about to battle face-snacking zombies and other greedy survivors. Don't panic – there are tons of weapons for you to choose from. Just stay sharp my friend and good luck - you're gonna need it.
